

HIGH-PERFORMANCE PROTECTION

MUNICIPAL POOLS, NATATORIUMS, UNIVERSITY POOLS,
NEIGHBORHOOD POOLS, APARTMENT POOLS, WATER PARKS

Every pool faces the same challenges. High maintenance costs put financial restrictions on parks and recreation departments, schools, pool management companies, builders, homeowner associations and taxpayers. The lack of proper coating protection puts the pool – a major investment – at risk. And if its painted interior face is cracked, faded, stained, slick or algae-covered, the pool just isn't very inviting.

Abrasion, chlorine contact, constant immersion, and exterior exposure will take their toll on all pool paints. Many will crack, peel, blister and chip after as little as one season, causing the very maintenance problems you're trying to solve.

Tnemec's high-build epoxy finishes tenaciously adhere to the substrate to resist moisture, abrasion, chemical attack and extreme seasonal temperatures.

FEATURES AND BENEFITS

- Low temperature cure available – will cure in temperatures as low as 35°F (2°C)
- Versatile application – spray, brush or roll
- VOC-compliant versions for all air districts
- Available in standard and accent colors
- Low cost installed coating systems
- A single source for all your coating needs

Tnemec's epoxy technology puts history and experience on your side. It has been the benchmark immersion coating for drinking water storage tanks and water treatment equipment for years. And there are decades of proven performance on pools, indoors and out.

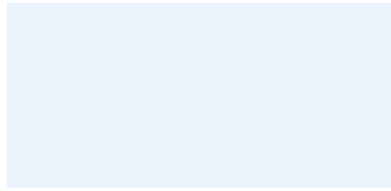

Your Tnemec representative offers excellent technical knowledge, assists with specifications and provides product recommendations to help applicators achieve optimal results. To get started, contact your local Tnemec representative.
